## SUMMARY

---

As a BCA student who is passionate about AI, my ambition is to begin my career in the AI business. I want to use my BCA knowledge to help with AI projects, learn more about machine learning and data analysis, and contribute to novel solutions. I'm excited to join a team where I can develop and make a positive impact using AI technology.

## TECHNICAL SKILLS

---

**Languages:** Java, Python, SQL

**Subjective:** Operating System, OOPs Concepts, Networking

**Tools:** Microsoft Office

## PROJECTS

---

### Spotify Clone App | *HTML, CSS, JS*

- Developed a basic Spotify clone app, employing fundamental web development technologies including HTML, CSS, and JavaScript.
- The project aimed to replicate core functionalities of the popular music streaming platform while showcasing proficiency in front-end development principles and techniques.
- Acquired hands-on experience in front-end web development fundamentals, including HTML semantics, CSS styling techniques, and JavaScript DOM manipulation.
